International Steel Trading

Coils & Strips

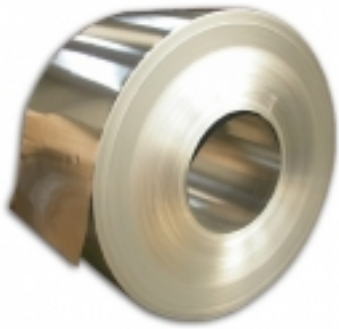

PPGI

Is suitable for applications in industrial environment with corrosion level above the average . [\[Product Details...\]](#)

HDG

Good corrosion protection and thus ensures long service life of the final article [\[Product Details...\]](#)

Tin Plate

Easily processed cold, welded, beamed, deep-drawn or painted and it safely protects the product it contains. Material that can be completely recycled. [\[Product Details...\]](#)

Galvalume Sheet Steel

55% Al-Zn coated sheet steel product suited for most types of roofing and siding applications as well as unexposed automotive parts, appliances and miscellaneous applications like furniture, outdoor cabinetry, pipe, etc. [\[Product Details...\]](#)

Hot rolled coils and plates

Have excellent formability characteristic and are thus suitable for applications involving cold plastic deformation such as drawing, deep drawing application for automotive, metal processing and white goods sector [\[Product Details...\]](#)

Cold rolled coils and sheets

Types: cold rolled steel forming, cold rolled electrical non-alloyed steel delivered in the semi-processed state, cold rolled micro-alloyed high yield strength steel for cold forming, cold rolled narrow steel strips for heat treatment, cold rolled steel fo [\[Product Details...\]](#)
